

MIWA 2026 – Bangkok

Mobility Interaction for a World in Action

JULY 21–23, 2026
Chulalongkorn University
Thailand

SAVE *the* DATE

MIWA (Mobility Interaction for a World in Action)

is a global platform launched from Asia to explore how mobility interacts with people, infrastructure, and services to create value for society.

Moving beyond purely technology-driven perspectives, MIWA focuses on practical, scalable, and sustainable mobility solutions—shaped by local contexts, constraints, and ingenuity.

Bringing together leaders from academia, industry, and government, MIWA connects global innovation with real-world implementation, creating a platform to share ideas, test solutions, and shape the future of mobility.

MIWA also fosters the next generation of mobility professionals and researchers by promoting collaboration and networking across academia and industry.
